

INNOVATIVE and AUSTRALIAN

DRAX ANT KILL PF

Protein formulation gel

This is a unique gel formulation bait specifically for the control of coastal brown ants. (9 g/Kg Boron as Boric Acid).

This product complements the well established Drax Ant Kill Gel formulation and also contains 9g/kg of Boric Acid as the active constituent. **DRAX ANT KILL PF** is a protein formulation ideal for the control of Coastal Brown Ants (*Pheidole magacephala*). Efficacy trials and early market feedback have proved that the source of the protein in the bait is highly attractive for Coastal Brown Ants. The colour of **DRAX ANT KILL PF** makes it very easy to identify how much of the product has been taken. Being a gel, **DRAX ANT KILL PF** is easy to use and in a form immediately palatable to ants. This is the only product specifically registered for Coastal Brown Ants which is approved for use indoors. The syringe applicator is suitable for bait guns and is ideal for applying in hard to reach spots, for crack and crevice control.

TIPS FOR USING DRAX ANT KILL PF

- Formulation available for both sugar and protein feeding ants.
- Product is ready to use and must not be mixed with any other product or solvent.
- Elimination of other food sources may greatly improve the effectiveness of the product.
- Place baits directly onto ants nests or foraging trails, as well as around areas where they are regularly observed. Use lots of small bait placements. Baits should be 2 cm long and 2 - 3 mm thick.
- Ensure there is sufficient baits for all foraging ants to have adequate opportunity to feed.
- Do not spray baits or ants with any chemical during the baiting cycle.
- Increased ant activity may be observed once baits are placed due to the attractive nature of the product.
- Feeding may stop after 12 - 24 hours. This is normal.
- Results may take time to become evident. (Up to 10 days).

PACK SIZE:
Available in 90g.

DIRECTIONS FOR USE

RESTRAINTS: DO NOT place baits in areas that are regularly washed as this will remove bait.

INDOORS: Apply gel indoors in areas where ants are seen, such as behind refrigerators and stoves, around water pipes and in cracks and crevices. Renew at monthly intervals until the desired level of control is achieved.

OUTDOORS: Where ants are seen entering the building, place small pea sized baits along walkways, directly on ants' nests and in cracks and crevices around windows and doors. Renew at monthly intervals until the desired level of control is achieved.

GENERAL INSTRUCTIONS :

DRAX ANT KILL PF is a ready to use product for baiting ants. The product should not be diluted or mixed with any other product or solvent. The cap should be replaced on the container after use. Use suitable equipment such as the hand held plunger supplied, or an appropriate bait gun when applying to cracks and crevices.

Sufficient product should be used to ensure that all foraging ants have adequate opportunity to feed. Feeding may only be evident for the first 12 – 24 hours after application. The elimination of other food sources will greatly increase the effectiveness of the product. Results may take some time to become evident.
