

MANCOZEB DG

750 g/Kg Mancozeb

The revolution of easier to use fungicides has resulted in the development of **MANCOZEB DG**. This formulation comes as small tiny granules which flow like a liquid and are dustless by nature. This results in a product which is safer to handle and easy to measure without losing the efficiency of the most cost effective turf fungicide.

MANCOZEB DG is effective in controlling Fusarium, Rhizoctonia and Helminthosporium. To use as a preventative fungicide **MANCOZEB DG** should be applied every 7 days.

If you currently use **MANCOZEB WP** as part of your fungicide program then no adjustment is needed to now use **MANCOZEB DG**. Application rate for both **MANCOZEB** formulations is 200-250g/100m²

Available in 2 Kg, 10 Kg and 20 Kg containers.
