

ZINEB

800 g/Kg ZINEB

ZINEB is a commonly used horticultural fungicide which has proven to be effective in controlling Helminthosporium in turf.

ZINEB is a zinc based dithiocarbamate complex making it similar in structure to MANCOZEB. **ZINEB** is ideal for use in conjunction with any turf program designed for controlling Helminthosporium.

It is important to alternate the chemical used in a fungicide program to ensure resistance to one particular chemical does not become too high. **ZINEB** and MANCOZEB are often alternated in fungicide programs to reduce Helminthosporium resistance.

If using **ZINEB** in a preventative program apply every 14-21 days or when the disease threatens. For curative measures apply at first signs of disease and repeat after 10 days.

RATES:

Bowling Greens - 1.5Kg/800 litres of water per full size green

Golf Greens, Tennis Courts & Lawns - 100g/50 litres of water per 100m²

Available in 500 g, 2 Kg, 10 Kg (20x500g) and 25Kg packs.
