

When roots and shoots need to be stimulated

Stimulus is a specialty liquid formulation designed to provide vigorous root and shoot development in turf. An ideal turf establishment and recovery product.

ANALYSIS

9%(w/v) Nitrogen (N) as Urea
11% (w/v) Phosphorus (P)
5% (w/v) Potassium (K) as Carbonate
1% Zinc (Zn) as Nitrate
7% Kelp as Kelpro

GENERAL USE

The continued formation of young healthy roots is important in turf maintenance particularly at times of stress, wear and dormant growth periods. Stimulus can be applied to the roots via drenching into the soil or as a foliar. Apply prior to periods of high environmental stress

AT RENOVATION

For quicker recovery from renovation Stimulus can be applied prior, during or post renovation practices.

TURF ESTABLISHMENT

Applications of Stimulus are also important in the establishment of turf and is best applied in a regular program until turf is ready for playing conditions. Begin applications to foliage at the 2nd tiller stage of development.

USING STIMULUS EFFICIENTLY:

- Apply to stimulate rapid plant recovery from insect and disease attack
- Apply to the leaf or as a soil drench for rapid uptake
- Apply prior to renovation
- Apply prior to high stress periods
- Apply monthly through the growing season

IMPROVED PLANT RECOVERY

Stimulus is an ideal product to use when roots are under stress from pests and diseases such as Pythium and Nematodes. Apply Stimulus as a foliar when roots are stressed as root up-take will be limited. Alternatively when the foliage is suffering environmental stresses or from disease and roots are functioning well apply to the foliage.

COMPATIBILITY

Stimulus can be mixed with all other members of the eFlow family. For added root stimulation apply with Auxinone.

PACK SIZE

Available in 20L containers. Special Order 200L & 1000L shuttles available on request

SITUATION	FOLIAR RATE	SOIL APPLICATION RATE
Golf Greens and other fine turf	10L / Ha or 100mL / 100sqm	20L / ha 200mL / 100sqm
Sportsfields / Race tracks	10 - 20L / ha	20 - 40L / ha
Bowling Greens	1.4L / Green	2.8L / ha
Turf Establishment Stolons or Sod	10L / ha	20 - 40L / ha
Establishing turf seed Stolons or Sod	10L / ha	20L / ha

The eFlow brand represents the highest quality liquid fertilisers developed specifically for the Australian Turf Market.

eFlow TANK MIXING

	Stimulus	Special FeX	Kope	Essential	Kelpro	Re-inforce
Stimulus		Light Blue	Dark Blue	Light Blue	Light Blue	Dark Blue
Special FeX	Light Blue		Dark Blue	Light Blue	Light Blue	Dark Blue
Kope	Dark Blue	Dark Blue		Dark Blue	Dark Blue	Dark Blue
Essential	Light Blue	Light Blue	Dark Blue		Light Blue	Dark Blue
Kelpro	Light Blue	Light Blue	Dark Blue	Light Blue		Dark Blue
Re-inforce	Dark Blue	Dark Blue	Dark Blue	Dark Blue	Dark Blue	

- These products are compatible in 2-way tank mixes.
- Foaming may occur in tank mixes containing Kope if sufficient water is not added to tank prior to addition of Kope. When tank mix includes Kope add this product to tank first as foaming may occur.
- Re-inforce does not tank mix with other products in the eFlow range. Sediment will form in the tank and cause nozzle blockages

	Rate (L) / ha	pH
Stimulus	20	1.7
Special FeX	40	1.8
Kope	50	11.34
Essential	20	5.50
Kelpro	10	7.83
Re-inforce	5	11.6

These products were tank mixed at rates equivalent to those that would be used when applied in a water volume of 400L
