

# **AUTO-FERT K Si**

A specially formulated blend of Silica and Potassium to provide a strong hard-wearing Turf Grass Sward

**ANALYSIS**

20% Silica( $\text{SiO}_2$ )

8.3% Potassium (K) as Potassium Silicate

**DIRECTIONS FOR USE:**

**Turf: Apply 3-5 litres of Barmac AUTO-FERT K Si per hectare (30ml-50ml per 100m<sup>2</sup>) in 1500 litres of water. A single application at renovation, or early in the growing season will increase cell wall strength, disease resistance and green speed. An application at early seed germination when over seeding will reduce damage caused by play and mowing. Do not exceed 3 applications per season.**

**Net Contents: 20 Litres**
