AUTO-PHOS

GENERAL RECOMMENDATIONS

Vegetables, Row Crops and Ornamentals

Apply 3 – 6 Litres of Auto-Phos as a foliar application per hectare. Multiple applications may be needed to correct deficiencies once they occur. Use a minimum of 100 litres of water per hectare per application.

Fruit Trees, Vine Crops and Orchards

Apply 4 – 6 Litres of Auto-Phos as a foliar application per hectare. Multiple applications may be needed to correct deficiencies once they occur. Use a sufficient amount of water to ensure adequate coverage. Coverage should occur to until just prior to the point of run-off.

Soil Application

Auto-Phos can be applied via fertigation by drip, sprinkler, water wheel or overhead irrigation at a rate of 7-20 Litres per hectare. Rates will vary between fields depending on pH and soil organic matter.

Mixing Instructions for Foliar Applications

1. Put 1/3 of water in tank
2. Add correct amount of Auto-Phos
3. Full tank with balance of water and agitate
4. Add other chemicals if any
5. Agitate adequately to mix

Caution: Check compatibility with chemical mixtures, complete a standard jar test. When mixing with chemicals, it is recommended to apply to a small area 24 hours prior to field application.
