

ECLIPSE

Greens Grade Black Layer Control Granules

ECLIPSE may be applied at any time of the year as a preventative or curative treatment for Black Layer and to improve seed establishment when overseeding.

DIRECTIONS FOR USE

To achieve best results, and to expose the Eclipse to the Black Layer, mechanical aeration (hollow tine, solid tine, slitting, etc.) is crucial.

1. Aerate or spike to a depth greater than the Black Layer.
2. Apply Eclipse at the recommended rate.
3. Using drag brushes or other appropriate method to drag as much of the product into the aeration holes as possible.
4. Leave aeration holes open, or if necessary, topdress using appropriate sized material.
5. Until recovered from Black Layer, do not over irrigate, and refrain from using iron, sulfur or organic based products.
6. Use nitrate based fertilizers and micro-nutrients like Manni-Plex products.
7. Two weeks following application of Eclipse, apply Parkway's Nocate WS at the rate of 15 grams per 100 square meters to reinforce microbial populations.

BARMAC INDUSTRIES PTY LTD
Box Flat Estate, Swanbank Road
SWANBANK, QLD 4306

APPLICATION RATES

Apply using conventional rotary or drop spreaders.

BLACK LAYER

Curative Treatment: Broadcast at the rate of 3 kg. per 100 square meters, following recommended pre-application procedures as shown. Irrigate lightly after application. Up to 4 annual treatments may be made.

Preventative Treatment: Broadcast at the rate of 1.5 kg. per 100 square meters following recommended pre application procedures as shown. Irrigate lightly after application. Up to 8 annual treatments may be made.

SEED ESTABLISHMENT

Scarify the area to be overseeded. Apply Eclipse at the rate of 2 kg. per 100 square meters, and complete normal overseeding practices.

HEALTH AND SAFETY

Storage and Handling: Store in a cool dry location away from heat sources, or direct sunlight. Keep container tightly closed, and in original packaging.

Dispose of in accordance with all Federal, State and local regulations. Wear eye and respiratory protection when handling this product to avoid inhalation or eye contact of dust. Use only in accordance with label.

Do not apply when land is frozen, flooded or snow covered. Do not allow to contaminate surface water. Do not apply within 10 feet of any public or private water supply.

CAUTION:

KEEP OUT OF REACH OF CHILDREN AND PETS

Eyes: Irritating to eyes. Eye protection should be worn when handling this product. In case of eye contact, flush eye with clear water for at least 10 minutes and consult a physician immediately.

Skin: Skin exposure may cause mild irritation. In case of skin contact, flush skin thoroughly with clear water first to remove residue, then wash thoroughly with soap and water. If irritation persists, consult a physician.

Ingestion: Do not take internally. In case of ingestion, do not induce vomiting, consult a physician immediately.

Inhalation: Wear protective equipment to avoid inhalation of dust. If product is inhaled and symptoms occur, consult a physician immediately.

FEATURES

- *Ties up H₂S*
- *Re-flocculates soil*
- *Moves moisture through soil profile*
- *Improves seed establishment*
