Batch  
Number:  
Date of  
Manufacture:

**Loch Ness is a unique pond and lake colourant designed to aesthetically improve the appearance of shallow and/or muddy ponds and lakes.**

### DIRECTIONS FOR USE:

LOCH NESS should be applied at the rate of 20 litres of LOCH NESS per surface hectare of water 1m deep (approximately 20 litres per 10,000m<sup>3</sup> of water).

First, measure the pond or lake, then calculate the amount needed to colour the water.

Next, add approximately half that dosage from several parts of the lake or pond being coloured. Once the first half of the dosage is incorporated, add the balance of the colourant until the desired colour is achieved.

LOCH NESS should always be added from several locations to ensure even dispersion.

Wear rubber gloves and eye protection when handling LOCH NESS to protect hands from staining. LOCH NESS is harmless to humans and wildlife, and once incorporated into a lake or pond will not stain humans, birds or fish.

LOCH NESS is produced from 100% food grade ingredients.

Avoid contact with skin, eyes and clothing. If product comes in contact with skin, wash thoroughly with soap and water. In case of eye contact, wash thoroughly with clear water and consult a physician. Affected clothing should be removed and washed thoroughly before reusing.

NOTICE: This product is designed only for the particular purposes indicated on the label. Failure to use the product strictly as directed may be illegal, prove dangerous and render the product ineffective. The buyer or user is responsible for any misuse or negligence in the handling, storage, use or disposal of this material. Barmac Industries Pty Ltd will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply and use of this product other than those responsibilities mandatorily imposed by Statutes applicable to the sale and supply of these goods.
