

Noculate Aqua

Microbial Pond Clarifier Pucks

NOCULATE AQUA is the safe, natural way to establish and maintain cleaner pond and lake water without chemicals. **NOCULATE AQUA Pucks** eliminate pond scum and green “soupy” conditions, while eliminating foul odours. **NOCULATE AQUA Pucks** improve water clarity and digest excess organic matter in ponds, lakes and fountains.

NOCULATE AQUA microbes preemptively consume organic matter which feeds algae and which leads to anaerobic conditions, including bad odours. The active microbes in **NOCULATE AQUA** feed on excess nutrients in the entire water column, from sludge at the bottom to suspended particulate, to green organic matter on the surface.

Active Ingredients

Natural, microbial based product containing 1 trillion CFU’s per pound of soil bacteria (including *Bacillus subtilis*) capable of biodegrading cellulose, lignin, hydrocarbons, and other organic pollutants in pond lake and fountain water for green slime, scum, and odour reduction; in an inert carrier for pond, lake, and fountain applications.

Directions for use

NOCULATE AQUA is most effective when water temperatures range from 10°C to 35° C. For best results, provide adequate surface or subsurface aeration.

CAUTION: Keep Out of Reach of Children.

Avoid contact with skin. If product comes into contact with skin, wash thoroughly. In case of eye contact, wash thoroughly with clear water. If irritation persists, contact a physician. Harmful if swallowed.

Features

Eliminates pond scum and green conditions

Digests excess organic matter in ponds, lakes and fountains

Improves water clarity

Eliminates sources of bad odours
