DIRECTIONS FOR USE

APPLICATION: Apply 2-3 kg per 100m² (200 kg – 300 kg per hectare) as necessary. The higher application rate should be used when turf growth is at its peak or when longer periods between fertilization are required.

Mow turf before application and allow at least 3 days before the next mowing.

Apply product with spreaders that will not grind or crack granules. Irrigate after application.

STORAGE: Product should be stored in a dry environment. Carefully reseal open bags or store in an airtight container.
